

TalentFlow API Specification

Version 1.0

Last Updated: September 29, 2026

I. Authentication & User Management (/api/auth, /api/users)

A. Login User

API Endpoint	/api/auth/login
Method	POST

Request Parameter	Type	Description
email	String	Registered user's email address
Password	String	User's account password

Authenticates a registered user and provides access to the system based on their assigned role

SUCCESS

Status code	200
Response Type	Json

Request Data	Type	Description
token	String	Authentication token for accessing protected endpoints
User	object	User's account password
user.id	integer	Unique user ID
user.email	string	User's email address
user.first_name	string	User's first name
user.last_name	string	User's lastname

user.role	string	User's system role
-----------	--------	--------------------

Sample Response
<pre>{ "token": "eyJhbGciOiJIUzI1NiIs...\"", "user": { "id": 12, "email": "recruiter@talentflow.com", "first_name": "Maria", "last_name": "Santos", "role": "recruiter" } }</pre>

FAIL

Status code	401 Unauthorized
Response Type	Json

Request Data	Type	Description
error	String	Description of the authentication failure

Sample Response
<pre>{ "error": "Invalid email or password" }</pre>

B. Register System User

API Endpoint	/api/auth/register
Method	POST

Request Parameter	Type	Description
-------------------	------	-------------

email	String	Email address of the new use
Password	String	Password for the new account
first_name	String	User's first name
last_name	String	User's lastname
role	String	Role assigned to the user

Creates a new system user account	
Sample Response	<pre>{ "email": "recruiter@example.com", "password": "Password123!", "first_name": "Maria", "last_name": "Santos", "role": "recruiter" }</pre>
SUCCESS	
Status code	201
<pre>{ "message": "User registered successfully.", "user": { "id": 2, "email": "recruiter@example.com", "first_name": "Maria", "last_name": "Santos", "role": "recruiter" } }</pre>	

Nn

FAIL	
Status code	409
<pre>{ "error": "Email is already registered." }</pre>	

II. Job Postings (/api/job-postings)

A. List Job Postings

API Endpoint	/api/job-postings
Method	GET
Description	Retrieves the available job postings in the system

SUCCESS	
Status code	200
<pre>[{ "id": 1, "title": "Software Developer", "department": "IT", "location": "Cavite", "description": "Develop and maintain software applications.", "requirements": "JavaScript, SQL, Git", "status": "open", "created_by": 3 }]</pre>	

FAIL	
Status code	500
<pre>{ "error": "Unable to retrieve job postings." }</pre>	

B. Create Job Posting

API Endpoint	/api/job-postings
Method	POST

Request Parameter	Type	Description
Title	String	Title of the job posting
department	String	Department offering the position
location	String	Location of the job
description	String	Description of the position
requirements	String	Qualifications and requirements
status	String	Current status of the job posting

Description	Retrieves the available job postings in the system
Sample Request	<pre>{ "title": "Software Developer", "department": "IT", "location": "Cavite", "description": "Develop and maintain software applications.", "requirements": "JavaScript, SQL, Git", "status": "open" }</pre>

SUCCESS	
Status code	201
<pre>{ "message": "Job posting created successfully.", "job_posting": {</pre>	

```
{
  "id": 1,
  "title": "Software Developer",
  "department": "IT",
  "location": "Cavite",
  "status": "open"
}
```

III. Job Assignments (/api/job-assignment)

A. Assign User to Job Posting

API Endpoint	/api/job-assignments
Method	POST

Request Parameter	Type	Description
job_posting_id	integer	ID of the job posting
user_id	integer	ID of the user being assigned

Description	Assigns a user, such as a recruiter, to a specific job posting
Sample Request	{ "job_posting_id": 1, "user_id": 5 }

SUCCESS	
Status code	201
{ "message": "User assigned to job posting successfully.", "assignment": { "id": 10, "job_posting_id": 1, "user_id": 5, "assigned_at": "2026-09-29T10:30:00Z" } }	

FAIL	
Status code	409
<pre>{ "error": "User is already assigned to this job posting." }</pre>	

IV. Applications & Applicant Profiles (/api/applications)

A. Submit Application

API Endpoint	/api/applications
Method	POST

Request Parameter	Type	Description
job_posting_id	integer	ID of the job posting being applied for
applicant_id	integer	ID of the applicant submitting the application

Description	Submits an application for a specific job posting
Sample Request	<pre>{ "job_posting_id": 1, "applicant_id": 25 }</pre>

SUCCESS	
Status code	201
<pre>{ "message": "Application submitted successfully.", "application": { "id": 101, "job_posting_id": 1, "applicant_id": 25, "kanban_stage": "Applied", "submitted_at": "2026-09-29T11:00:00Z" } } </pre>	

FAIL	
Status code	400
<pre>{ "error": "Unable to submit application." }</pre>	

B. Update Application Kanban Stage

API Endpoint	/api/applications/{applicationId}/stage
Method	PATCH

Request Parameter	Type	Description
applicationId	integer	ID of the application
kanban_stage	string	New stage of the application

Description	Applied Screening Interview Offer Rejected
Sample Request	<pre>{ "kanban_stage": "Interview" }</pre>

SUCCESS	
Status code	200
<pre>{ "message": "Application stage updated successfully.", "application": { "id": 101, "kanban_stage": "Interview", "updated_at": "2026-09-29T13:00:00Z" } }</pre>	

V. Resumes (/api/resumes)

A. Upload Resume Document

API Endpoint	/api/resumes
Method	POST
Content-Type	multipart/form-data

Request Parameter	Type	Description
application_id	integer	ID of the application associated with the resume
file	file	Resume document uploaded by the applicant

Description	Uploads a resume document and associates it with an application
--------------------	---

SUCCESS	
Status code	201
<pre>{ "message": "Resume uploaded successfully.", "resume": { "id": 50, "application_id": 101, "file_url": "/uploads/resumes/applicant_101.pdf", "uploaded_at": "2026-09-29T11:15:00Z" } }</pre>	

FAIL	
Status code	400
<pre>{ "error": "Invalid or missing resume document." }</pre>	

VI. **AI Screenings (/api/ai-screenings)**
A. **Process or Retry AI Screening**

API Endpoint	/api/ai-screenings
Method	POST

Request Parameter	Type	Description
application_id	integer	ID of the application to be screened
retry	boolean	Indicates whether the screening is a retry

Description	Processes an applicant's resume using AI to generate a fit score and explanation based on the job requirements. The same endpoint may be used to retry a failed screening
Sample Request - Initial Screening	{ "application_id": 101, "retry": false }
Sample Request - Retry	{ "application_id": 101, "retry": true }

SUCCESS	
Status code	200
{ "message": "AI screening processed successfully", "screening": { "id": 20, "application_id": 101, "fit_score": 87, "explanation": "The applicant meets most of the required technical qualifications", "status": "completed", "retry_count": 0, "screened_at": "2026-09-29T11:30:00Z" } }	

```
}  
}
```

FAIL	
Status code	422
{ "error": "AI screening could not be completed.", "status": "failed", "retry_count": 1 }	

VII. Recruiter Evaluations (/api/recruiter-evaluations)
A. Submit Recruiter Evaluation

API Endpoint	/api/recruiter-evaluations
Method	POST

Request Parameter	Type	Description
application_id	integer	ID of the application being evaluated
evaluator_id	integer	ID of the recruiter submitting the evaluation
rating	integer	Recruiter's rating of the applicant
notes	string	Recruiter's comments or assessment

Description	Allows a recruiter to submit an evaluation for an applicant
Sample Request	{ "application_id": 101, "evaluator_id": 5, "rating": 4, "notes": "Applicant demonstrates strong technical skills and relevant experience." }

SUCCESS

Status code	201
<pre>{ "message": "Recruiter evaluation submitted successfully.", "evaluation": { "id": 30, "application_id": 101, "evaluator_id": 5, "rating": 4, "notes": "Applicant demonstrates strong technical skills and relevant experience.", "created_at": "2026-09-29T14:00:00Z" } }</pre>	

FAIL	
Status code	400
<pre>{ "error": "Invalid evaluation data." }</pre>
